

## **Rainout Policy**

The website administrator will update the field status announcement on the Home page of [www.msasoccer.com](http://www.msasoccer.com) by 5 PM every day and, if possible, issue a general email announcement to all club members if the training fields are closed due to weather conditions. Members may also be notified via email or telephone from the age group coach or team manager.

MSA will provide a safe training environment based on current or forecasted weather conditions. Lightning and proximity of such will be a contributing factor to field closures, along with flooded or saturated ground conditions. If a session is cancelled due to lightning, all players and parents must go to their cars immediately and wait for official notification before returning to the fields.

Each respective MSA coach will make the appropriate decision regarding rainout on that given day of training as long as the practice facilities remain open. Each team should have a communication system to notify all team members (examples email, text messages and phone tree). If possible, a training session that is canceled because of rain may be rescheduled on a different day of the week.

League game rainouts are determined by the respective field or league that you will be playing at for that day. Please consult your team manager for details per rainout. Field status for all home games will be updated by MSA on the Club website.
